INSPIRATION

Evolution of The Seattle Film Summit

In an effort to merge lanes we have changed our name to THE SUMMIT. The 2023 Summit will include elements from the music, fashion, publishing, and gaming industry. The future of creative economy lies in ever-evolving alliances and partnerships. All grown from the backbone of a creative culture shift. Community is THE CORE. Moving forward the Summit will embody it's values in every step it takes.

Our Values:

- Honor: Our ability to grow self and a commitment to the service to others.
- Humility: Recognition that community growth benefits us all.
- Honesty: Accountability to self, transparency in service, and community.
- Heart: Social and emotional recovery for self and community.

By aligning with these four values, we will 'auto' elevate our community. It is here where we make our industry unique. The technology, minds, and creatives who drive industry are everywhere in the world. But here, we can build a culture of peer elevation, respect, and honor.

We're not interested in just sponsors. We're asking you to lock arms with us as we draw a line in the sand. It's time the artistic nature of our community is CELEBRATED, honored, and protected.
